PLANMECA

Unveil the perfect smile

*A smile can make a difference. The **Planmeca Romexis® Smile Design** software upholds the standard of excellence we are known for, as it allows dentists to design patients the smile of their dreams in a matter of minutes. The software does not require any additional equipment or software to function – offering easy to use tools for designing beautiful, natural and harmonious smiles.*

Give your patients a reason to smile!

Improve efficiency

Communicate clearly
Increase case acceptance

Key features:

• Use a 2D face photo and intelligent tooth silhouettes to design any patient a digital mockup of a new smile

• Fast and easy to use – design a new smile in 3 minutes

• Reveal clear results in advance and drastically increase case acceptance

• Revolutionise team collaboration by communicating visually with other specialists and dental laboratories

• All needed tools in the same software

• Work on all teeth at the same time – designing each tooth individually

• Automatically receive precise information regarding the ratio of tooth height and width

• Export completed smile designs to any CAD/CAM software to put the plan into practice

• Easily send designs to patients, other specialists or dental labs via the **Planmeca Romexis® Cloud** file transfer service

• Save patient information to our secure patient database

A fast and easy workflow

## Design a digital mockup in 3 minutes on the first visit

Planmeca Romexis® Smile Design is characterised by its smooth and streamlined workflow. The software allows manipulation of the position, shape or dimensions of each tooth individually to achieve the best possible look and fit – ensuring fantastic results in only a few minutes.
❶ Align and calibrate

- Adjustable vertical and horizontal orientation lines
- Free drawing smile lines
- Accurate angle and distance measurements

❷ Diagnose and design

- Quickly scalable tooth silhouettes
- Width and height measured automatically
- Ratio of width and height calculated automatically
- Crown lengthening tool
- Tooth mirroring
- Up to 14 tooth silhouettes available
- Five different tooth shapes available (standard, oval, triangular, rectangular, square)
- Possibility to save own tooth shapes
- Adjustable silhouette transparency
- Smile area definition

- Aligning retractor image for gumline design
- Possibility to work with the retractor and smile images simultaneously

❸ Simulate and present

- Photorealistic simulation
- Adjustable shade
- Viewing before-and-after images
- Possibility to print design
- Sending designs to iPhone or email

Clear communication

Plameca Romexis® Smile Design is an exceptional tool for communication. It allows dentists to communicate visually with an interdisciplinary team of specialists and dental laboratories – ensuring that treatment goals accepted by the patient are reached. Designs can be securely shared via the *Planmeca Romexis® Cloud* file transfer service or the *Planmeca mRomexis™* mobile application.

Integration with CAD/CAM and Ortho solutions

Planmeca Romexis® Smile Design allows dentists to do more than clear visualisation. Completed smile designs can be fluidly exported on to any CAD/CAM software for realisation, such as *Planmeca PlanCAD® Easy*, *Planmeca Romexis® 3D Ortho Studio* or any *Planmeca Romexis®* 3D module. The 2D design acts as a visual guide or reference for physical mockup designing, as well as final restoration.
